

VIP shown with optional equipment.

An Update on a Classic

The VIP is a thoroughly modern flushable portable restroom. With our new "Lifetime" roof, an updated interior, power roof vent and third component compartment, this self-contained restroom is a step above the competition. With many options available, the VIP can be made to your specifications. Built in the U.S.A. with our proprietary extruded aluminum structural elements, lightweight polyethylene walls and Sun Strong Fiberglass doors, our VIP is known as the workhorse of the industry.

Small Changes, Big Difference

Using many of the same high quality elements as our Classic VIP, the VIP interior is designed with years of customer feedback. The new placement of the paper towel dispenser minimizes drips and the need for cleanup, while the additional interior lighting and power roof vent is appreciated by all.

Specifications

Exterior Ht: 91", Int Ht: 79", Width: 48", Depth: 43.5", Weight: 600lbs,

The 'Lifetime' roof is built of the same materials as the walls and floors. Attached with our extruded aluminum corners, it adds rigidity and a firm mount for both the powered vent and solar panel.

With a third service compartment, our VIP provides extra storage for optional equipment, accessories and/or cleaning and maintenance supplies. The sturdy aluminum framed access doors lock for security.

The exceptionally clean design of the VIP includes additional lighting and a powered roof vent.
